Sample Questions and Detailed Answers from NBME Surgery

Form 2

Question 1: Emergency Management of Blunt Abdominal Trauma

Scenario: A 35-year-old male presents after a motor vehicle collision with abdominal pain, hypotension, and tachycardia. On examination, there is tenderness in the right upper quadrant. Question: What is the next best step in management? Answer: Immediate assessment with focused assessment with sonography for trauma (FAST) ultrasound, followed by surgical intervention if indicated. Explanation: - The patient shows signs of hypovolemic shock likely due to intra-abdominal injury. - FAST ultrasound helps rapidly identify free fluid (blood) in the abdomen. - If FAST is positive and the patient is unstable, prompt surgical exploration (laparotomy) is indicated. - In stable patients, further imaging like CT scan may be performed.

Question 2: Management of Appendicitis

Scenario: A 22-year-old woman presents with right lower quadrant pain, nausea, and low-grade fever. Question: What is the most appropriate initial management? Answer: Surgical consultation for appendectomy, with preoperative antibiotics. Explanation: - Clinical presentation suggests acute appendicitis. - The standard treatment is surgical removal of the appendix. - Antibiotics are administered preoperatively to reduce infection risk. - Imaging (ultrasound or CT) can confirm diagnosis but should not delay surgery if clinical suspicion is high.

Question 3: Postoperative Wound Infection Prevention

Scenario: A patient undergoes elective colorectal surgery. Postoperatively, the wound shows signs of infection. Question: What measures can reduce the risk of surgical wound infection? Answer: - Proper skin antisepsis before incision. - Use of prophylactic antibiotics within one hour before incision. - Maintaining normothermia during surgery. - Adequate blood glucose control, especially in diabetics. - Minimizing operative time and tissue trauma. - Proper wound closure techniques. Explanation: Adherence to infection control protocols significantly reduces postoperative wound infections.

Organizing Answers To Nbme Surgery Form 2

Organizing Answers To Nbme Surgery Form 2 in digital form is an essential step to ensure long-term usability, efficiency, and easy access. As your digital library grows, unorganized files can quickly become difficult to manage, leading to wasted time searching for documents and potential loss of important information.
