Core Concepts and Theoretical Foundations

Reitz's book systematically builds the foundation of electromagnetic theory, starting from fundamental principles and progressing toward advanced topics. Below, we explore some of the core aspects addressed in the work.

Maxwell’s Equations: The Cornerstone

At the heart of Reitz's exposition lie Maxwell's equations, which describe how electric and magnetic fields are generated and interact. The book offers a thorough derivation of these equations from experimental laws, including: - Gauss's Law for Electricity: $\nabla \cdot \mathbf{E} = \frac{\rho}{\varepsilon_0}$ - Gauss's Law for Magnetism: $\nabla \cdot \mathbf{B} = 0$ - Faraday's Law of Induction: $\nabla \times \mathbf{E} = -\frac{\partial \mathbf{B}}{\partial t}$ - Ampère-Maxwell Law: $\nabla \times \mathbf{B} = \mu_0 \mathbf{J} + \mu_0 \varepsilon_0 \frac{\partial \mathbf{E}}{\partial t}$ Reitz emphasizes the physical significance of each equation, their symmetries, and their implications, such as the existence of electromagnetic waves.

Mathematical Tools and Techniques

Reitz’s approach involves extensive use of vector calculus, differential equations, and boundary value problems. The book introduces and applies tools such as: - Divergence and curl theorems - Boundary conditions at interfaces - Potential theory and scalar/vector potentials - Green’s functions and integral equations These mathematical techniques are vital for solving real-world electromagnetic problems, such as wave propagation, antenna design, and electromagnetic compatibility.

Electromagnetic Waves and Radiation

A significant portion of the book focuses on electromagnetic wave theory: - Wave equations: Derived from Maxwell's equations, describing how fields propagate in free space and media. - Plane and spherical waves: Analysis of solutions and their physical interpretations. - Radiation from antennas: Understanding how accelerating charges generate electromagnetic waves. - Waveguides and transmission lines: Modes of propagation, cutoff frequencies, and field distributions.
