This article aims to provide a comprehensive overview of the Kannada alphabets, including detailed descriptions, words, and visual representations to facilitate learning and appreciation of this beautiful script.

Overview of Kannada Alphabets

The Kannada script is an alphasyllabary, which means it combines consonants and vowels into syllabic units. It is derived from the ancient Brahmi script and shares similarities with other South Indian scripts like Telugu and Tamil. The script comprises vowels (swaragalu), consonants (vyanjanagalu), and various conjunct forms. The Kannada alphabet is typically divided into the following sections: - Vowels (Svaragalu) - Consonants (Vyanjanagalu) - Vowel-Consonant Combinations (Syllabic forms) - Additional symbols for nasalization, anusvara, etc. Understanding these components is essential for mastering reading, writing, and pronunciation in Kannada.

Vowels (Svaragalu)

The Kannada vowels are fundamental building blocks. There are 14 core vowels, each representing a specific sound, with their independent and dependent forms.
