Sample Thermodynamics MCQs with Answers and Explanations

To illustrate the nature of thermodynamics MCQs, here are some sample questions, their correct answers, and detailed explanations:

Question 1:

Which of the following is a state function in thermodynamics?

1. Work
2. Heat
3. Enthalpy
4. Entropy

Answer:

c. Enthalpy

Explanation:

State functions depend only on the current state of the system, not on how it attained that state. Enthalpy (H) is a thermodynamic property determined solely by the state variables (pressure, temperature, composition). Conversely, work and heat are path functions, meaning their values depend on the process path taken, not just the initial and final states. Entropy is also a state function, but since enthalpy is explicitly listed as an option, it is the most suitable answer here.

Question 2:

According to the second law of thermodynamics, which process is impossible in an isolated system?

1. Increase in entropy
2. Decrease in entropy
3. Reversible process
4. Both b and c

Answer:

b. Decrease in entropy

Explanation:

The second law states that in an isolated system, entropy never decreases; it either remains constant for a reversible process or increases for an irreversible process. Therefore, a decrease in entropy in an isolated system is impossible, making option b the correct answer. Reversible processes are ideal and do not violate the second law, but they are idealizations, not impossible in theory.

Question 3:

The efficiency of a Carnot engine operating between two reservoirs at temperatures T_1 and T_2 ($T_1 > T_2$) is given by:

1. $1 - T_2/T_1$
2. T_2/T_1
3. $1 - T_1/T_2$
4. T_1/T_2

Answer:

a. $1 - T_2/T_1$

Explanation:

The Carnot cycle is the most efficient engine operating between two temperature reservoirs. Its efficiency (η) is given by: $$ η = 1 - \frac{T_2}{T_1} $$ where T_1 is the temperature of the hot reservoir, and T_2 is the temperature of the cold reservoir (both in Kelvin). This formula emphasizes that maximum efficiency depends solely on the temperature difference, and no real engine can surpass this efficiency.

Question 4:

In an ideal gas, which property remains constant during an isothermal process?

1. Internal energy
2. Enthalpy
3. Temperature
4. Pressure

Answer:

c. Temperature

Explanation:

An isothermal process occurs at constant temperature. For an ideal gas, internal energy (U) depends only on temperature, so it remains constant. Similarly, enthalpy (H) depends solely on temperature in ideal gases. However, the defining characteristic of the process is that temperature remains unchanged, making option c the correct answer.

Printing Tips

Despite the advantages of digital formats, printing Thermodynamics Multiple Choice Questions And Answers remains important for many users. Whether for study, annotation, or archival purposes, proper printing techniques ensure that the physical copy maintains the quality and structure of the original document.

Before printing, users should review page setup options carefully. Adjusting page size, orientation, and margins helps prevent content from being cut off or misaligned. Selecting the correct paper size is especially important for documents designed with specific layouts, such as textbooks or manuals.

Duplex printing is an effective way to reduce paper usage and create more compact documents. Printing on both sides of the paper not only saves resources but also makes large documents easier to handle and store. Many modern printers support automatic duplex printing, simplifying the process.

Print quality settings should be adjusted based on purpose. Draft mode is suitable for internal review or rough notes, while high-quality settings are better for final copies or professional presentations. Balancing quality and ink usage helps manage printing costs effectively.

For long documents, printing selected sections rather than the entire file can save time and resources. Using bookmarks or table of contents entries allows users to target specific chapters or pages, making printing more efficient and purposeful.
