Sample Questions by Category

Below is a detailed examination of typical questions candidates may encounter, along with insights into what skills they assess.

1. Numerical Reasoning and Data Interpretation

These questions test the ability to interpret data and perform calculations relevant to air traffic operations.

1. **Sample Question:** An aircraft is flying at an altitude of 30,000 feet and is approaching a controlled airspace boundary. The aircraft's rate of climb is 500 feet per minute. How long will it take to reach 35,000 feet?
2. **Solution:** To ascend 5,000 feet at 500 feet per minute: $5000 / 500 = 10$ minutes.

2. Spatial Reasoning and Visualization

These questions evaluate a candidate's ability to interpret spatial information, crucial for understanding radar screens and traffic patterns.

1. **Sample Question:** You see three aircraft on your radar: Aircraft A at 15 miles east, heading north at 250 knots; Aircraft B at 10 miles south, heading east at 200 knots; and Aircraft C at 20 miles northwest, heading southeast at 180 knots. Which aircraft poses the greatest potential conflict in the next 15 minutes?
2. **Answer Strategy:** Candidates must analyze speed, heading, and distance to predict possible conflicts, testing their situational awareness and predictive skills.

These questions assess reasoning under complex or ambiguous scenarios.

1. **Sample Question:** Two aircraft are on converging paths at different altitudes. Aircraft D is at 35,000 feet heading north, and Aircraft E is at 33,000 feet heading south. Both are 20 miles apart. If Aircraft D maintains its speed and altitude, and Aircraft E descends at 1,000 feet per minute, when and where will their paths cross?
2. **Answer Strategy:** Requires calculations of descent and speed, emphasizing critical analysis and planning skills.

4. Aviation Regulations and Protocols

Questions testing knowledge of international and national aviation rules.

1. **Sample Question:** When communicating with an aircraft, which of the following phrases is NOT standard protocol?
 1. a) "Delta three five zero, turn left heading two zero zero."
 2. b) "United two five zero, descend to one five thousand feet."
 3. c) "Aircraft, report your position."
 4. d) "Maintain current heading."

Answer: b) "United two five zero, descend to one five thousand feet." (Incorrectly phrased; standard phraseology would be "United two five zero, descend and maintain one five thousand feet.")

5. Situational Judgment and Decision-Making

Candidates interpret complex or stressful situations.

1. **Sample Question:** An aircraft reports a technical issue and requests to hold at a nearby waypoint. Meanwhile, two other aircraft are approaching the same airspace. How should you prioritize your actions?
 1. a) Clear the traffic for the approaching aircraft first.
 2. b) Grant the holding request immediately.
 3. c) Communicate with all aircraft to coordinate a safe sequence.
