Analyzing Graduation Trends Reflected in the 2014 List

The graduation list from 2014 is particularly insightful when analyzed in comparison to previous years. It reveals noteworthy trends in student performance, program popularity, and gender representation.

Increase in Graduate Numbers

Data indicates that the 2014 graduation period saw an increase in the total number of graduates compared to 2013. This growth can be attributed to several factors:

1. Expansion of academic programs, especially in engineering and technology disciplines
2. Increased enrollment rates fueled by government policies promoting higher education access
3. Enhanced academic support systems improving student retention and success rates

The rising numbers are also reflective of JKUAT's strategic positioning as a hub for technical education in East Africa, attracting a diverse student body.

Distribution of Degree Classes

The classification of degrees awarded in 2014 provides insight into academic standards and student achievement. While the majority of graduates received Second Class Lower or Pass degrees, a significant proportion attained First Class and Second Class Upper honors. This distribution suggests:
