Sample Questions and Activities from Changes in States of Matter Worksheets

Multiple-Choice Question

Which process involves a solid turning directly into a gas?

A) Melting

B) Freezing

C) Sublimation

D) Condensation

Answer: C) Sublimation

Fill-in-the-Blank Activity

The process of a liquid turning into vapor at the surface is called _____.

Answer: Evaporation

Diagram Labeling

(Provide an illustration of particles in solid, liquid, and gas states. Ask students to label each diagram accordingly.)

Scenario Question

Imagine you leave an ice cube outside on a warm day. Describe the changes it undergoes from solid to gas, including the energy involved.

Sample Response:

As the ice cube warms, it first melts into water (solid to liquid) by absorbing heat. When the water reaches its boiling point, it begins to evaporate, turning into vapor (liquid to gas). This process requires heat energy, which increases the particles' movement until they escape into the air as gas.
