Highlighting Some Iconic Studies from the 4th Edition

While it's impossible to cover all forty studies in one piece, some stand out for their profound impact and

continued relevance. Let’s look at a few that often spark lively discussion and have deeply influenced psychology.

Stanley Milgram’s Obedience to Authority

Milgram’s experiment is a cornerstone of social psychology, demonstrating how ordinary people can commit harmful acts when instructed by an authority figure. The study’s ethical implications sparked debate and led to stricter guidelines for protecting participants in research. Today, it serves as a powerful example of conformity, obedience, and the dark side of social influence.

Albert Bandura’s Bobo Doll Experiment

Bandura’s work revolutionized our understanding of learning by showing that people can acquire new behaviors simply by observing others, without direct reinforcement. This social learning theory challenged traditional behaviorist models and paved the way for modern approaches to education and therapy, emphasizing modeling and imitation.

Elizabeth Loftus and the Malleability of Memory

Loftus’ research uncovered the fragility of human memory, especially the ease with which false memories can be implanted.
