Understanding the California Pest Control Practice Exam Branch 2

When it comes to pest control licensing in California, the Department of Pesticide Regulation (DPR) mandates that candidates pass specific exams based

on the branch they wish to certify in. Branch 2 focuses primarily on wood-destroying pests such as termites, carpenter ants, wood-boring beetles, and fungi that cause wood decay. This branch requires a thorough knowledge of pest biology, inspection techniques, treatment methods, and regulatory compliance specifically related to structural pest control.

What Does Branch 2 Cover?

Branch 2 exams test your understanding of: - Identification of wood-destroying pests and organisms - Inspection and detection techniques for structural infestations - Treatment methods including chemical and non-chemical options - Safety protocols for handling pesticides and equipment - California regulations and laws concerning pest control operations - Reporting and documentation standards for pest inspections This broad scope ensures that licensed operators are equipped not only with technical skills but also with the knowledge necessary to protect public health and property effectively.
